FREE POC Program

See RFID work in your stores. At zero cost.

A live, 30 day proof of concept deployed in your actual environment, with your SKU mix and your team, so results are proven before you commit a dollar.

99%+	30 Days	$0	94%
INVENTORY ACCURACY	DEPLOYMENT GUARANTEE	COST DURING POC	POC TO DEPLOYMENT RATE

Why prove it before you buy it

RFID technology is proven. Your operation is not generic. A vendor who skips the pilot is asking you to trust that your store formats, legacy systems, and SKU mix will behave like everyone else's. ClarityRFID runs the POC because there is nothing to hide and everything to prove, in your environment, on your terms.

What is included, at no cost

- ✓ Site survey and environment audit before a single tag is deployed
- ✓ Full hardware and platform access: readers, antennas, and Clarity Store
- ✓ A dedicated implementation partner assigned from day one
- ✓ Live data from your actual stores, not a sandbox or a demo
- ✓ A documented results report and a tailored 30 day deployment plan
- ✓ Flexible SaaS pricing after the POC, built around your business

Built for retailers who move at scale.

This program is built for multi-location retailers with stores in apparel, footwear, and other inventory-intensive categories. Sign up now, spots are limited.

The 30 Day Track

Environment setup and integration, hardware installation, associate training, and a full production go-live, with a dedicated partner on call through Day 30.

ARE YOU READY TO PROVE IT IN YOUR STORES?

"The free POC was a working engagement. By Day 14 we had live inventory reads, baseline accuracy data, and a deployment plan we actually trusted."

- Director of Inventory Management, Mid-Market Fashion
